

# 5 Gallon Pail Pumps

## Material Supply Systems

### 5 Gallon Pail Pumps

#### General Description:

EMC<sup>2</sup> can supply a wide variety of 5 gallon pail pumps to meet the requirements of any dispensing system. The pumps are available in a variety of materials, ratios and designs and can supply materials at pressures from 500 psi to 6500 psi. For continuous operation requirements, the pumps can be fitted with crossover systems and devices which can send signals to the control system or turn on audible alarms.

#### Features:

- Pump designs to match the material requirements
- Air preparation and controls included
- Dual elevators for all pumps
- Heavy duty cast follower plates
- Air bleed port on the pump outlet
- Air bleed "T" handle on the follower plate
- Air assist valve for pail removable
- 20"W x 24"L x 65"H Footprint

#### Options:

- Low level indicators or shutdown controls
- Automatic crossovers
- Seal materials for main rod and follower plate
- Air to material pressure ratio 10:1 to 65:1
- Chop check or double ball design
- Coated steel or Stainless steel available
