

55 Gallon Drum Pumps

Material Supply Systems

55 Gallon Drum Pumps

General Description:

EMC² M-5000 Bulk Drum Pumps were designed to dispense high viscosity, ambient temperature adhesives and Sealers. The Pumps are available in a variety of materials, and ratios to meet the requirements of your dispensing needs. Quick Cycling Air Valve helps reduce pump wink and provides consistent material pressure. The M-5000 Drum Pump's modular design allows for flexibility to accommodate changes in the application requirements. The Pumps, air-motors, platens and even the fixtures can be changed into any combination.

Features:

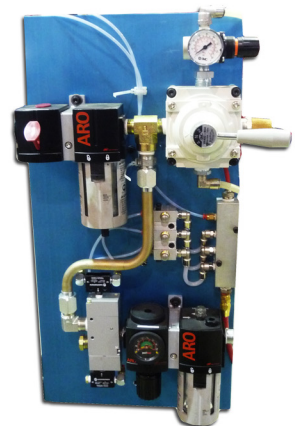

- Oil-Less Air Motor
- Large internal Passages
- Steel Internal Check Valves
- Ability to handle temperature up to 200 degrees f

Options:

- Electric Controls
- Automatic Changeover- Electric or Pneumatic
- Low/empty Light tower
- Casters
- Automatic Depressurization
- Pump Runaway

Benifits:

Ratio	Air Motor Size	Volumetric Displacement	Pump Offerings
24:1	6 inch	12in ³ / Stroke	Stainless Steel, Carbon Steel and TPC Coating
42:1	8 inch	12in ³ / Stroke	Stainless Steel, Carbon Steel and TPC Coating
65:1	10 inch	12in ³ / Stroke	Stainless Steel, Carbon Steel and TPC Coating
